DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species III, Figures 3A-3D, 4 and 5 in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

partially compressed inside the closed reservoir and, when the device is from the closed position to the open position, the application member becomes uncompressed.

5. Claims 1-17, 22-51, 60-67, 70-91, 96-123, 132-141, 144-164, 169-194, 203-212 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (4,896,768).

The Anderson et al reference discloses an application device comprising a first portion 16 having an impermeable surface, ; a second portion 12 moveable with respect to the first portion 16, wherein the first portion 16 and the second portion 12 define a substantially closed reservoir when the device is in the closed position; and an applicator member 14 being partially compressible, when the device is in the closed position, the application member 14 is at least partially compressed inside the closed reservoir and, when the device is from the closed position to the open position, the application member 14 becomes uncompressed.
